## SUMMARY

---

Aspiring Web Developer with a design background, skilled in understanding user needs and collaborating across teams. Proficient in analyzing project feasibility and development workflows, with a strong ability to learn new technologies. Combines analytical thinking and design expertise to deliver user-centric solutions aligned with business goals and committed to staying current with industry trends to drive innovative outcomes.

## WORK EXPERIENCE

---

### Front-end Developer Intern

May 2024 - August 2024

*My Homework Rewards*

Canada

- Designed and updated course pages, blog templates, and key sections of the website, embedding code to enhance functionality and ensure visual consistency.
- Collaborated with supervisor to audit and improve site structure, ensuring all pages met SEO best practices and maintained a cohesive design across the platform.
- Tested and optimized web pages for cross-browser compatibility and mobile responsiveness, ensuring a seamless user experience.

### UI/UX Designer

January 2022 - August 2023

*Qingping Printing Company*

China

- Collaborated as a team to accomplish projects and meet customer needs. Produced over 10,000 pieces during this period. Timely communication with team members to leverage our strengths and utilize each team member's expertise to complete high-quality projects.
- Finished 15+ project designs through CorelDRAW. Worked with the team and proofread to ensure dimensions were available for final product production.
- Designed visual elements to be applied to packaging, and improved client-supplied materials via Photoshop to ensure visual elements fit the project theme and uniformed the effect.

## PROJECT EXPERIENCE

---

### Earth Resource Warning ( [Website Link](#) / [Figma Link](#) )

December 2023

*Web Design & Development*

- Created a whole website interactive prototype in Figma, with 15+ wireframes, low and high fidelity, and used components and styles to make it reusable, to ensure the design is consistent and easily maintainable.
- Design-to-development transition ensures compliance with WCAG standards. Implemented 7 dynamic pages using HTML5, CSS3, and vanilla JavaScript.

### SkyCatch - Climate Application ( [Figma Link](#) )

December 2023

*User Interface Design*

- Explored and visualized the context and functionality of the application. Ensure the app is suitable for different people, meets user needs and solves pain points through research and analysis, sitemap, user journeys, and user flows.
- Founded a whole climate application's interface design by Figma. Ensure that users access current, future and different area weather information and alerts easily. Helps users to plan travel efficiently and adjust transportation methods based on different weather conditions.
