SUMMARY

Designer with a background in visual communication and web development. Experienced in creating clean, engaging interfaces and visual assets, and collaborating with cross-disciplinary teams to bring ideas from concept to launch. Excited to explore creative challenges and craft digital experiences that inspire.

WORK EXPERIENCE

Web Designer/Developer Intern

May 2025 – June 2025

GM Digital Inc.

Canada

- Designed and launched a responsive WordPress website using Elementor Pro, creating five custom case study pages with a focus on clarity and usability.
- Collaborated closely with content and creative teams, communicating design ideas and layout proposals to ensure consistent branding and intuitive user navigation throughout the site.
- Conducted site reviews with my supervisor and made improvements to SEO, accessibility, and mobile responsiveness.

Front-end Designer Intern

May 2024 - August 2024

My Homework Rewards

Canada

- Designed and updated course pages, blog templates, and key sections of the website, embedding code to enhance functionality and ensure visual consistency.
- Collaborated with supervisor to audit and improve site structure, ensuring all pages met SEO best practices and maintained a cohesive design across the platform.
- Tested and optimized web pages for cross-browser compatibility and mobile responsiveness, ensuring a seamless user experience.

Graphic Designer

2020 - August 2023

Qingping Printing Company

China

- Designed over 15+ custom packaging designs for clients in the food, pharmaceutical, and consumer goods industries.
- Translated client concepts into production-ready designs, balancing branding, layout structure, and practical constraints.
- Worked directly with clients and production teams to ensure accurate execution from concept to print.

PROJECT EXPERIENCE

ClimaTrack Canada ([Website Link](#) / [Figma Link](#))

Web Design & Development

- Designed the user experience and interface for a climate reporting web application, focusing on clarity, accessibility, and real-time data visualization.
- Created responsive layouts and interactive map features to display environmental data using geolocation.
- Built structured admin and user dashboards with accessible layouts and intuitive filtering systems.
- Collaborated across design and development to integrate live APIs while maintaining usability and performance.

Case Files: Hotel Levvie ([Website Link](#) / [Figma Link](#))

UI/UX Design

- Led the design of a narrative-driven website, creating user flows and 10 interactive pages.
- Collaborated closely with Audio and Developer teams to deliver an eerie, accessible web experience using Figma, HTML, CSS, and JavaScript.
